

# What does Mr. Lightning do?

## History

Mr. Lightning installs lightning protection systems! We have been in the lightning protection business since 1959. We protect structures from lightning caused damage. Those structures include residential homes, commercial office buildings, and government buildings, to name a few. We travel all over the state of Colorado and the country. Lightning protection systems include the following elements:

- Air terminals (lightning rods)
- Conductors
- Grounds
- Surge suppression devices

## Wait, what does Mr. Lightning do?

- ✓ **Commercial Installations** – Including but not limited to warehouses, office buildings, high-rises, sheds, elementary schools, universities, high schools, and churches.
- ✓ **Government Installations** – Including but not limited to NORAD Northcom Facility, Ft. Carson, Buckley AFB, the USAFA, Schriever AFB, and OPBAT in the Bahamas.
- ✓ **Residential Installations** – Home installations include the Colorado Springs area, the Denver area, the Boulder area, the Vail area, the Aspen area, the Telluride area, and the Fort Collins area to name a few.
- ✓ **Lightning Protection Designs** – We provide custom lightning protection system designs in CAD for architects and engineers.
- ✓ **Interior Grounding** – Businesses like Century Link, and Time Warner have interior grounding needs.
- ✓ **Exterior Grounding** – Many military bases require grounding locations for their air planes. We provide different types of exterior grounding to meet a variety of needs.
- ✓ **Lightning Protection Certifications** – Certifications can be integral to ensure that lightning protection systems are installed correctly and are fully functional.

**Commercial Installations**
